## **Who we are looking for**

The Swedish Institute Scholarships for Global Professionals (SISGP) programme is part of the Swedish government's international awards scheme aimed at developing global leaders who will contribute to [the United Nations 2030 Agenda for Sustainable Development](#). It is funded by the Ministry for Foreign Affairs of Sweden and administered by the Swedish Institute (SI). The programme offers a unique opportunity for global professionals to develop professionally and academically, to experience Swedish society and culture, and to build a long-lasting relationship with Sweden and with each other.

The goal is to enable the scholarship holders to play an active role in the positive development of the societies in which they live. Ideal candidates are ambitious young professionals with academic qualifications, demonstrated work and leadership experience, ambition to make a difference by working with issues which contribute to a

just and sustainable development in their country in a long term perspective, and a clear idea of how a study programme in Sweden would benefit their country.

Priority will be given to applicants with a strong and relevant professional background and demonstrated leadership experience.

### **How we evaluate and select**

After the application deadline, we carry out a screening of all applications and disqualify those that do not meet the eligibility criteria for SISGP. In addition, if you fail to follow the instructions for required documents, such as incomplete application, wrong form, missing valid stamp, etc., your application will be disqualified. Reasons for disqualification are given in the instructions in the forms and here on the website. Therefore, it is very important that you read through all available information carefully.

We will then evaluate all the eligible applications and take into consideration all the information provided in your applications. We will grade them according to the aim and purpose of the scholarship programme. We are looking for talented and active professionals with capability, a platform and ambition to contribute to international development. You will find more information about the kind of candidates we are looking for above. The evaluation is comprehensive and therefore you need to be outstanding in all aspects to get through the tough competition and be selected for a scholarship. We give priority to certain factors which you can read more about in [the eligibility criteria section](#).

When the admission results for master's studies are announced at [universityadmissions.se](http://universityadmissions.se) on 3 April 2020, we will do a further evaluation of the eligible applications which have been admitted (including conditional admissions) to a Swedish university and make the final selection from them. Your scholarship application will therefore no longer be considered if you are not admitted by 3 April 2020.

The quality of the application is crucial in our selection. We compile a short list on the basis of the evaluation process described above. However, we aim at having all genders represented as equally as possible in the final list of scholarship recipients. We also want to include as many of the eligible countries and Swedish universities as possible, provided there is sufficient number of strong applications. We also need to stay within our budget. We may therefore make an additional adjustment in the final selection process in order to achieve the distribution we are aiming for. We do not have any quotas for specific countries, fields of study, Swedish universities, etc.

The competition for SISGP is very high. We recommend that you also look for other scholarship opportunities from your government, from organisations in your country, or from Swedish universities.
